

Technical specification

Clients

Besides a browser no other installations are needed by clients.

Tested browsers:

- Microsoft Internet Explorer (5.0, 5.5, 6.0, 6.1)
- Netscape Navigator (5.0, 6.0, 7.0)
- Mozilla (1.0, 1.1)

Requirements::

- JavaScript: Optional, not necessary
- Only for chat-applet (JDK 1.1.8; AWT)

- JavaScript: Nicht notwendig (optional)
- Security: SSL encryption 2.0; 3.0 (optional)

Server

teamspace is programmed in Perl and Java. Qualified platforms for the server are Windows NT, Windows 2000 and several UNIX options (e.g. SUN Solaris, HP-UX, AIX, Linux, *BSD etc.). The following server configurations are recommended:

Hardware:

- Pentium III processor with at least 800 MHz,
- System memory with least 512 MB,
- Hard disk (depending on size of File storage) with at least 40 GB.

Software:

- Operating system: Linux (Kernel 2.2, Kernel 2.4 recommended)
- Web server: Apache (from release 1.3) and Tomcat (release 3 and above) resp. JServ Apache module.
- Java JRE (release 1.2.2 and above)
- Perl (release 5.6.1. and above)
- Data base: Not required. Data is stored on the server in directories. Encryption is optional.
- Mail connectivity: Access to a SMTP relay (indication of IP address) or locally installed and configured sendmail (or similar)
